

# SMARTER POWER

By working closely with our clients we can:

-  Adopt best practice in the design of sites to ensure energy efficiency
-  Raise awareness of sustainability in the power generation industry
-  Provide honest, tested and reliable advice regarding energy efficiency to meet sustainable goals
-  Encourage data sharing from equipment lists to power usage to enable Gofer to assess power demand at an event and provide the most efficient power setup.
-  Switch to alternative and new energy technology sources where suitable to reduce the carbon impact.
-  Continually review new practices and technology to establish the most sustainable options.
-  Provide an energy monitoring service to establish power usage data and access how improvements can be made for future events.
-  By 2021 to introduce green credential tracking for all jobs and introduce a green credential contract.

## CONTACT US

## GOFER'S SUSTAINABILITY PLEDGE

## PLEDGE

Gofer is committed to minimising the impact of our activities on the environment, encourage sustainable initiatives for our clients and comply with all relevant environmental legislation.

We aim to make a significant, long term contribution to improving the environment for now and future generations, by ensuring that sustainability is a fundamental part of our activities.

OUR  
PLEDGE  
TO  
YOU

## COMMITMENTS

-  Raise awareness, empower and encourage employees and sub-contractors to embrace sustainable practices in all areas of the business. Provide training where appropriate to their role and encourage networking to share and learn what others are doing.
-  Raise awareness, empower and encourage clients to embrace sustainable practices. Offer alternative power solutions that have a reduced impact on the environment.
-  Work with our suppliers to hire and purchase goods and services that are sustainable and environmentally responsible.
-  Carry out a logistical review of transportation requirements to minimise travel distance and ensure the most suitable sized vehicle is used.
-  Aim to eliminate where possible or reduce the amount of waste created and reduce the amount of waste sent to landfill.
-  Ensure that our operations are carried out in an environmentally efficient manner, reduce, reuse or recycle resources used where possible.
-  Monitor and report on our sustainability through key performance indicators. Set targets and strive for continuous improvements. Key areas of monitoring include energy, water, waste and carbon for Gofer and energy and carbon for our clients.
-  Communicate and celebrate both internally to staff and to our clients the progress of our sustainability goals, to encourage and promote changes to others.
